

ACD Systems is the largest and most respected independent digital image editing and management provider in the world. The company was founded in 1993 and has offices in the US and Canada.

ACD Systems has millions of corporate and consumer customers worldwide. The company's product family includes ACDSee Pro 5, Pro Mac and ACDSee 14 for photo editing and management, and Canvas technical illustration software. ACD Systems has a very strong portfolio of clients including Caterpillar, Boeing, the New York City Fire Department, Procter & Gamble, government agencies, NASA, CN Rail, Encana, Exxon Mobil and many more.

ACDSee 14 is a fast, flexible and affordably priced photo organization and editing software available for home or business use. Users enjoy real-time viewing, management, editing and sharing of multiple image files. ACDSee 14 competes with Adobe Photoshop Elements and Corel Paintshop Pro in this market space.

### Why choose ACDSee 14

- **ACDSee 14:** One of the easiest and most flexible software packages available in the marketplace for photo editing and image library organization. Available in several languages.
- **Intuitive Workflow:** Intuitive workflow solution for photo editing, management and sharing of images offers Manage, View, Edit and Online modes.
- **Speed:** Instant access to files and images using the user's own file tree system without having to import images into the program for viewing or editing.
- **Organization:** Powerful way to organize and manage an image collection. Multiple, customizable ways to tag, label, sort and organize to meet individual preferences.
- **Marketplace:** Competes with Adobe Photoshop Elements and Corel Paintshop Pro and is priced attractively.

### Key Features and Benefits of ACDSee 14

- **Managing:** Managing a growing image collection in ACDSee 14 is easy. Connect directly with your folder tree on your computer, and browse and work on your files without delay. Totally customizable and flexible to fit how you work.
- **Viewing:** Customizable and powerful viewing of images at full screen or pixel level.
- **Editing Tools:** Full suite of editing tools including red eye removal, watermarks, adding text, drawings, special filters, vignettes and many more.
- **Geotagging:** Incorporate your images into Google Maps with full geolocation data.
- **LCE:** Patented LCE (Lighting and Contrast Enhancement) technology. Harness the power of LCE to improve the quality of poorly lit photos, and achieve HDR photo results from a single image.
- **Special Effects:** A powerful suite of popular pre-set filters to quickly produce high quality images. Including Lomo Effect, Orton Effect and Collage Effect
- **Storage:** The purchase of ACDSee 14 includes 10 GB free cloud space on ACDSee Online, a place to store, share and back up your images safely and securely in the cloud.
